Сорти | Strains — дистрибуции, растојанија и класи

$\|\bar{x}-v\|$ = апсолутна разлика меѓу средната вредност на сортата и секој резултат (процентни поени). Δ до следен = растојание до следниот повисок резултат, во процентни поени и како релативен % од помалата вредност. | $\|\bar{x}-v\|$ = absolute difference between the strain mean and each result (percentage points). Δ to next = distance to the next higher result, in percentage points and as a relative % of the lower value.

Жолти редови: без ниту еден сертификат — основа е декларираната вредност; тестирајте пред формално декларирање класа. | Yellow rows: no certificate on file — declared value used; test before declaring a grade.

Финални опсези на потенција по сорта | Final Potency Grade Ranges per Strain

Врз основа на 99 верификувани резултати — ова се финалните опсези по класи за секоја сорта: 20 сорти дефинитивно, 4 провизорно (само декларирана основа). Формалното усвојување останува во спецификациите QCSP по редовна процедура. | Based on 99 verified results — the final grade ranges per strain: 20 strains definitive, 4 provisional (declared basis only). Formal adoption remains with the QCSP specifications through the regular procedure.

Истите опсези, по новите спецификациски имиња | The same ranges, keyed to the new specification names

Новите имиња на сортите се преземени од листот **01_Portfolio_Master** (78 серии, 54 преименувања, 36 нови имиња). Оваа табела ги дава истите докажани опсези, но групирани по новото име — за преглед без рачно

барање кое старо име одговара на кое ново: 31 име дефинитивно, 5 провизорно, 0 без сидро. | The new strain names are taken from the [01_Portfolio_Master](#) sheet (78 batches, 54 renames, 36 new names). This table carries the same evidenced ranges grouped by the new name, so no manual old-to-new lookup is needed: 31 name definitive, 5 provisional, 0 without an anchor.
