**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува

The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| Nº | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|----|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1  | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2  | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7  | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic definition set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and **☐** the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic definition set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

| № | PARAMETER Параметар                                     | METHOD Метода                    | ACCEPTANCE CRITERIA Критериум              | DISPOSITION Одлука |
|---|---------------------------------------------------------|----------------------------------|--------------------------------------------|--------------------|
| 1 | Identification A · Appearance Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description | Conforms to monograph                      | Conforms Одговара  |
| 2 | Identification B · Microscopy Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      | Conforms to monograph                      | Conforms Одговара  |
| 7 | Foreign Matter Страни материи                           | Ph. Eur. 2.8.2 · mon. 3028       | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds | Conforms Одговара  |

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

| 1 | <b>Identification A · Appearance</b> Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description | Conforms to monograph                      | <b>Conforms</b> Одговара |
| 2 | <b>Identification B · Microscopy</b> Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      | Conforms to monograph                      | <b>Conforms</b> Одговара |
| 7 | <b>Foreign Matter</b> Страни материи                           | Ph. Eur. 2.8.2 · mon. 3028       | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds | <b>Conforms</b> Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | Conforms    | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | Conforms    | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic definition set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic definition set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | Conforms    | Одговара |

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **☒** marks the outcome recorded for this batch and **☐** the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

**04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION** | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | Conforms    | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤ 2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

**CULTIVATION BATCH №**  
СЕРИЈА НА КУЛТИВАЦИЈА № **WC072501**

**MONOGRAPH**  
МОНОГРАФИЈА **Ph. Eur. mon. 3028**

**EXAMINED ON**  
ИСПИТАНО НА **01.12.2025**

**PACKAGING**  
ДАТУМ НА ПАКУВАЊЕ **01.12.2025**

**PRODUCT SPECIFICATION №**  
СПЕЦИФИКАЦИЈА НА ПРОИЗВОД № **QCSP\_001\_WC-II\_v.01**

Cannabis flos · Ph. Eur. 11.5 mon. 3028 · Intermediate Bulk · Examined on the dried bulk **before packaging began**; issued after review. Испитано пред почеток на пакувањето.

**02 ANALYTICAL METHODS** | АНАЛИТИЧКИ МЕТОДИ

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤ 2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 7 | Foreign Matter                | Страни материји           | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | Conforms    | Одговара |

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | Conforms    | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

| 7 | Foreign Matter Страни материи                           | Ph. Eur. 2.8.2 · mon. 3028       | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds | <b>Conforms</b> Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | Conforms    | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

ПРОИЗВОДНА СЕРИЈА № P060012

CULTIVATION BATCH №  
СЕРИЈА НА КУЛТИВАЦИЈА № WC082501

MONOGRAPH  
МОНОГРАФИЈА Ph. Eur. mon. 3028

EXAMINED ON  
ИСПИТАНО НА 13.01.2026

PACKAGING  
ДАТУМ НА ПАКУВАЊЕ 13.01.2026

PRODUCT SPECIFICATION №  
СПЕЦИФИКАЦИЈА НА ПРОИЗВОД № QCSP\_001\_WC-I\_v.01

Cannabis flos · Ph. Eur. 11.5 mon. 3028 · Intermediate Bulk · Examined on the dried bulk **before packaging began**; issued after review. Испитано пред почеток на пакувањето.

02 ANALYTICAL METHODS | АНАЛИТИЧКИ МЕТОДИ

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic definition set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic definition set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic definition set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

МОНОГРАФИЈА Ph. Eur. mon. 3028

EXAMINED ON  
ИСПИТАНО НА 17.02.2026

PACKAGING  
ДАТУМ НА ПАКУВАЊЕ 17.02.2026

PRODUCT SPECIFICATION №  
СПЕЦИФИКАЦИЈА НА ПРОИЗВОД № QCSP\_001\_PUM-I\_v.01

Cannabis flos · Ph. Eur. 11.5 mon. 3028 · Intermediate Bulk · Examined on the dried bulk **before packaging began**; issued after review. Испитано пред почеток на пакувањето.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic definition set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | Conforms    | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

|---|----------------------------------------------------------------|----------------------------------|--------------------------------------------|--------------------------|
| 1 | <b>Identification A · Appearance</b> Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description | Conforms to monograph                      | <b>Conforms</b> Одговара |
| 2 | <b>Identification B · Microscopy</b> Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      | Conforms to monograph                      | <b>Conforms</b> Одговара |
| 7 | <b>Foreign Matter</b> Страни материи                           | Ph. Eur. 2.8.2 · mon. 3028       | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds | <b>Conforms</b> Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | Conforms    | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic definition set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic definition set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

| 7 | Foreign Matter Страни материи                           | Ph. Eur. 2.8.2 · mon. 3028       | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds | <b>Conforms</b> Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **☒** marks the outcome recorded for this batch and **☐** the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic definition set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*

04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

**CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. **ⓧ** marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

## 04 RESULTS, ACCEPTANCE CRITERIA & DISPOSITION | РЕЗУЛТАТИ, КРИТЕРИУМИ И ОДЛУКА

| № | PARAMETER                     | Параметар                 | METHOD                           | Метода | ACCEPTANCE CRITERIA                        | Критериум | DISPOSITION     | Одлука   |
|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-----------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | <b>Conforms</b> | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | <b>Conforms</b> | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

|---|-------------------------------|---------------------------|----------------------------------|--------|--------------------------------------------|-----------|-------------|----------|
| 1 | Identification A · Appearance | Идентиф. А · Изглед       | Ph. Eur. mon. 3028 · Description |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 2 | Identification B · Microscopy | Идентиф. Б · Микроскопија | Ph. Eur. 2.8.23 · mon. 3028      |        | Conforms to monograph                      |           | Conforms    | Одговара |
| 7 | Foreign Matter                | Страни материи            | Ph. Eur. 2.8.2 · mon. 3028       |        | ≤ 2.0% / 25–50 g · < 1 cm leaves, no seeds |           | Conforms    | Одговара |

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.

ПРОИЗВОДНА СЕРИЈА № **P060492**

CULTIVATION BATCH №  
СЕРИЈА НА КУЛТИВАЦИЈА № **JD042601**

MONOGRAPH  
МОНОГРАФИЈА **Ph. Eur. mon. 3028**

EXAMINED ON  
ИСПИТАНО НА **13.08.2026**

PACKAGING  
ДАТУМ НА ПАКУВАЊЕ **13.08.2026**

PRODUCT SPECIFICATION №  
СПЕЦИФИКАЦИЈА НА ПРОИЗВОД № **—**

*Cannabis flos* · Ph. Eur. 11.5 mon. 3028 · Intermediate Bulk · Examined on the dried bulk **before packaging began**; issued after review. *Испитано пред почеток на пакувањето.*

☒ **CONFORMS** Соодветствува The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under the site quality system, and a retention sample is held. *Резултатите се однесуваат само на примениот примерок; извештајот се репродуцира само во целост.*
