

Purely Plant — QCSP 001 Specification Matrix

eCoA results per specification parameter - all batches, chronological - informal working export, not a controlled document - built 13.08.2026

SOURCE AND SCOPE

• Source: InH_QC_COAs - source-271bc3be-1d61-4541-8d5b-be3ff8ab7d97 - 263 files, all completed (verified live 13.08.2026)

• 77 batches - 95 sub-rows (testing rounds) - 1227 result lines (1038 transcribed + 189 declared in-house Conforms: FM and macro/micro ID) - 540 parameter cells Missing / not tested - 367 certificates indexed.

• Values are transcribed from the certificates verbatim; measurement uncertainty is excluded from result cells; units live in the column header, not the cells. Clean numeric results are stored as numbers whose format preserves the certificate's printed decimals.

• 'Conforms' entries whose reference reads 'proposed' are declared by the QC Manager (13.08.2026). Foreign Matter was determined in-house per SOP prior to final QC sampling and packaging, and macroscopic + microscopic identification per specification was performed in-house after final QC sampling — all results pass. Each cites the CoA proposed for issuance (CoA-PP-[YYYY][NNNN]) per QCSP 012 v.03, one sequential series for the (CoA type and calendar year) index and row name, avoiding the Conformance Register (CR 13.0320). The combined ID (CoA, batch) has identification rate of a batch. The full macroscopic chain is on the 'CoA' scope for sheet batches.

• Global site closely each THC assay against the column's QC-SP 001 v.02 ladder. Calculation is not a disposition: no conformity is derived or colour-coded anywhere in this workbook — a failure exists only where the laboratory declared one.

HOW TO READ THE MATRIX

• One row-back per batch. Batches tested in more than one campaign split into sub-rows, one per testing round (certificate issue dates more than 60 days apart open a new round); the Round column labels each sub-row with its month span.

• Per parameter: Result cell, then the certificate reference 'code, date, lab', hyperlinked to the scan on Drive. Same-day paired certificates stack one line inside a sub-row; the cell's hyperlink opens the first listed scan, and the Certificate index sheet carries every certificate's own link.

• 'Missing / not tested' spans all sub-rows when the knowledgebase holds no result for that parameter; '—' marks a parameter tested in another round of the same batch, but not this one.

• Column C proposes the CoQ document code of each TESTING ROUND — one CoQ issuance event per sub-row, per QCSP 012 v.03 §6.4.2 (CoQ-PP-[YYYY][NNNN], one sequential series per calendar year). The initial round's CoQ issues on completion of the initial QC sampling; a re-sampling (R) round produces a superseding CoQ with a new issue date that carries the resampled parameter; new results and resues the re-sampled results from the earlier sampling's eCoAs (time-invariant parameters such as heavy metals and pesticides). Codes run in results-complete chronology — see the 'CoQ issuance plan' sheet for each event's basis date, re-sampled vs carried-forward.

LABORATORY ABBREVIATIONS

CNP — УУМ Фармацевтический факультет — Центр за природни производи / UKIM Faculty of Pharmacy — Center for Natural Products (LT-083)

FARM — Факултет / Farmchem Laboratory for Environmental Sciences (LT-017)

IPH — Институт за јавно здравје / Institute of Public Health (LT-050)

SPL — Државна фитосанитарна лабораторија / State Phytosanitary Laboratory (LT-036)

PP — Purely Plant — in-house CoA (three R&D batches ingested on instruction)

COVERAGE PER SPECIFICATION PARAMETER (of 77 batches)

No	Parameter	Unit	A.C.	Tested	Missing
1	Macroscopic ID (Test A)	—	Conforms to description	77	0
2	Microscopic ID (Test B)	—	Conforms to description	77	0
3	HF/TLC ID (Test C)	—	Identity confirmed	28	49
4	Total 21-THC	%	Per target grade (QCSP 001 §03)	77	0
5	Total CBD	%	≤ 1.0	77	0
6	Total CBN	%	≤ 1.0	38	39
7	Foreign Matter	%	≤ 2.0	77	0
8	Loss on Drying	%	≤ 12.0	71	6
9.1	TAMC	CFU/g	≤ 10 ⁶	46	31
9.2	TYMC	CFU/g	≤ 10 ⁶	46	31
9.3	Bile-td, gram-negative	CFU/g	≤ 10 ⁶	46	31
9.4	Salmonella	—	Absence (25 g)	46	31
9.5	Escherichia coli	—	Absence (1 g)	46	31
10.1	Albatoxin B1	µg/kg	≤ 2	22	55
10.2	Total Albatoxins	µg/kg	≤ 4	51	26
10.3	Ochratoxin A	µg/kg	≤ 20	22	55
11.1	Lead (Pb)	mg/kg	≤ 0.5	46	31
11.2	Cadmium (Cd)	mg/kg	≤ 0.3	46	31
11.3	Arsenic (As)	mg/kg	≤ 0.2	46	31
11.4	Mercury (Hg)	mg/kg	≤ 0.1	46	31
12	Pesticide Residues	—	≤ LOQ (Ph. Eur. 2.8.13)	46	31

Proposed CoQ issuance plan — one Certificate of Quality per testing round of each batch, in results-complete chronology (the latest certificate issue date within the round; declared iCoAs excluded from the basis date). The initial round's CoQ issues on completion of the initial QC sampling; a resampling (R) round produces a superseding CoQ with a new issue date carrying the resampled parameters' new results and reusing the non-resampled results from the earlier sampling's eCoAs (time-invariant parameters such as heavy metals and pesticides — 'Carried forward' below). Supersession per QCSOP 012 v.03 §6.7 ("Supersedes [original] — reason: resampling"). Codes are proposed pending the Certificate Issuance Register (QCLB 020).

Ns	CoQ code (proposed)	Results complete	Production	Batch	Strain	Round	Newly tested / resampled (items)	Carried forward (items)	Not covered (items)	Supersedes

Proposed iCoA issuance list — internal Certificates of Analysis to be issued for in-house determinations performed per SOP: Foreign Matter prior to final QC sampling and packaging; macroscopic + microscopic identification (one combined iCoA) after final QC sampling — all results pass, declared by the QC Manager 13.08.2026. Numbering per QCSOP 012 v.03: one sequential series for the iCoA type per calendar year; codes and issue dates are proposed pending assignment from the Certificate Issuance Register (QCLB 020). Chronological by the production date encoded in the batch number.

Nº	iCoA code (proposed)	Scope	Spec items	Production	Batch	P-Number	Strain	Proposed issue date
