☒ **CONFORMS** *Соодветствува*

The tested sample **conforms** to the compendial requirements for **Identification A**, **Identification B** and **Foreign Matter** per Ph. Eur. 11.5 Monograph 3028, general chapters 2.8.23 and 2.8.2 — foreign matter **absent** from the examined portion, against a ≤ 2.0% criterion. ☒ marks the outcome recorded for this batch and ☐ the alternatives available to the analyst. Macroscopic descriptors follow the cultivar's profile; the microscopic detection set and the foreign-matter conformity statements are the same for every batch. No material was separated from the examined portion, so there was nothing to weigh; the mass field stays blank until a figure exists. Results relate only to the sample as received; this report may be reproduced only in full. Out-of-specification results are handled under **QCSOP 014**, and a retention sample is held under **QCSOP 009 / Annex 8**. *Резултатите се однесуваат само на приемниот примерок; извештајот се репродуцира само во целост.*
