

77	250	20	4	45	263
BATCHES	CERTIFICATES	CULTIVARS	LABORATORIES	FULL PANEL	COAS INGESTED

Source of record. Every entry is transcribed from an outsourced-laboratory certificate held in the Letta knowledgebase [ImB_QC_COAs](#) (source source-271bc3be-10d1-4541-8a5b-be3f6fab7c97), which holds **263** ingested certificates, all processed. Values are shown as printed; where a batch was assayed more than once the readings are kept side by side. A cell is marked present (✓) only where the knowledgebase holds a transcribed result — never a pass/fail judgement.

Legend. ✓ a transcribed result is on file · — no result on file · Δ⁹-THC shows the assay value(s) in %; multiple values are separate assays of separate samples. **Cov.** is the count of the 16 release-critical parameters with a result. **Disposition** reflects panel coverage and any laboratory-declared non-conformance only. Panel: LoD, Δ⁹-THC, CBD, CBN, aflatoxins, ochratoxin A, Pb/Cd/As/Hg, pesticide screen, TAMC, TYMC, bile-tolerant gram-negative (BTGN), E. coli, Salmonella. Stability-study timepoints are held apart from this release register.
