Foreign Matter (Param. 7)

Specification Ref.

Референца на спецификација

QCSP-IMB-001 v.02 · §7

01 Analytical Method | Аналитички метод

Method Метода	Method validation status: Cp · VERIFIED SOP · QCSP-005 v.02
Foreign Matter — Manual Gravimetric Examination(Ph. Eur. 2.8.2)	
Representative 50.0 g of dried inflorescence is spread on a clean stainless tray; macroscopic + tactile examination at 10× magnification; foreign matter is hand-separated into categories (stems > 3 mm, leaves not from inflorescence > 5 mm, mineral particles, animal matter, foreign plant material). Each category is weighed on a calibrated 4-decimal balance (Sartorius MSA225P-1CE-DA · Cal-Cert 2026-04 · u(m) = 0.0002 g). Whole & broken seeds are searched and dissected from suspect particles. Test performed PRIOR to sampling for batch release , immediately before primary packaging.	

02 Result(s) · Categorical Breakdown | Резултат(u)

№	Foreign-Matter Category	Identification & Examples	Mass (g)	% w/w	Status
1	Stems & stalks > 3 mm ØSame-plant non-flower fraction; per Ph. Eur. 2.8.2 “other parts of the same plant”	Stem fragments (woody)	0.4200	0.84 %	OK
2	Sugar leaves & fan leaves > 5 mmNon-bract leaves separated from inflorescence cluster	Loose leaf material	0.1500	0.30 %	OK
3	Mineral foreign matterSoil, sand, silica grit — confirmed by tactile + density check	Mineral grit (trace)	0.0200	0.04 %	OK
4	Other plant foreign matterAny non-cannabis vegetable material	Fibre traces	0.0100	0.02 %	OK
5	Animal matterInsects, insect parts, droppings, mites	None observed	0.0000	0.00 %	OK
Total Foreign Matter			0.6000 g	1.20 % w/w	PASS

SEEDS **Seed check (whole + broken):** 0 whole seeds, 0 seed fragments observed in 50.0 g. **Suspect particle dissection (n=3):** all confirmed as stem fragments — **no seed embryo** present. **Result: ABSENT** (criterion met).

03 Method Validation · Measurement Uncertainty | Валидација на метод · Мерна неодреденост

Method Status Статус на метод
Compendial · Verified for cannabis flower matrix per Ph. Eur. 5.x (verification of compendial procedures) · Verification dossier QCV-007 v.02 · 6-lot inter-day reproducibility < 0.10 % w/w absolute · 2 analyst inter-analyst bias < 0.05 % w/w.
Measurement Uncertainty Мерна неодреденост
Weighing u(m) = 0.0002 g (balance certificate) · Visual classification u(class) ≈ ±10 % rel. of separated mass · Combined expanded uncertainty (k=2, ~95%) on FM total ≈ ±0.06 % w/w absolute . Reported 1.20 % w/w ± 0.06 %.

Conforms

Result: The tested sample **conforms** to the product specification **QCSP-IMB-001 v.02 §7 (Foreign Matter)** per Ph. Eur. 11.5 Monograph 3028 + general chapter 2.8.2 — total foreign matter **1.20 % w/w** (≤ 2.0 %) and seeds **ABSENT** (zero-tolerance criterion met). Test executed prior to primary packaging. QC disposition only; final batch release is certified separately by the QP in linked CoQ CoQ-PP-2026-0011.

Notes | Забелешки

1. These results relate **only to the tested sample(s)** as received in the QC Laboratory.
2. **No part of this report may be reproduced** except in full, without prior written permission of the QC Laboratory.
3. Measurement uncertainty is evaluated in accordance with the QC Laboratory's quality system; the **detailed uncertainty calculation is available on request**.
