

Purely Plant — ImB Potency Specifications, remaining strains

The seven strains PP-QC-SPEC-001 v5.5 does not cover. PP-QC-SPEC-001 v5.6 (remaining strains) · Issued 11.08.2026 · Companion to v5.5 (Tranche 1, 13 strains).

Status: proposed, not released. Derived from the potency history; requires QC approval before governing anything. Conventions follow v5.5: contiguous bands, top of Spec I fixed at 30.00%, lower limit inclusive and upper exclusive, product code {ABBR}-THC{nominal}:CBD1, a quarter-range buffer under the lowest observed result where attainable. CBD acceptance criterion < 1.0% throughout.

Sleepy Joy (SJ)

Ladder spacing. Spaced 6.00 / 6.00 / 5.00 / 5.25 rather than an even 5.00 ladder. An even ladder breaking at 10.00 % would split 9.20 % into one band and 10.96 / 11.20 % into the next, leaving margins of 0.96 % and 1.20 % — both under the buffer. This ladder holds all three results in Spec IV with 1.45 % clear.

Companion to PP-QC-SPEC-001 v5.5, which carries the other 13 strains. Two strain names need settling before release: v5.5 says “Cap Junkie” where the register now says Cap Junky, and the register says “Permanent Market” where v5.5 and the control sheet say Permanent Marker.
